ParlSpeech V2 dataset (Rauh and Schwalbach 2020)

- The dataset contains parliamentary speeches from 9 countries covering periods between 21 and 32 years

- Additional meta-data include date, speaker, party, and partially agenda item

- Has for example been used for analyses on politicians behaviour, speech sentiment, stance on policy issues or influence of / on different other variables (i.e. age, gender, etc.)

- For a (non-comprehensive) list of further examples: **http://unihb.eu/parlspeech**

- You can find the dataset via **http://unihb.eu/parlspeech_dataset**

- If you have further questions please contact Hannes Salzmann (h.salzmann@uni-bremen.de) until Wednesday, May 8th
